

INSPIRING FUTURE SKILLS

WHO IS WITWA?

Women in Technology WA (WITWA) is the leading advocate for diversity, equity and inclusion (DEI) for women in technology in Western Australia.

Our goal is to encourage and retain more women in the tech industry across WA. We provide support to those already working in the tech sector, offer upskilling and reskilling opportunities for women interested in emerging areas of work, and strive to inspire the next generation to seize the opportunities that future skills bring. Join us in embracing the exciting possibilities that technology has to offer!

WHAT ARE TECHTRAILS?

A Techtrails is a full day STEM incursion for Western Australian schools designed to generate passion, excitement and to inspire young people to consider careers in STEM. Our focus is showcasing amazing women working in these fields, and to empower young people, and particularly girls to see themselves in these careers.

We leverage our extensive industry networks to source some of Western Australia's most inspirational professionals and entrepreneurs to talk to students about their career journey, what their job is actually like providing curated activities to give students hands-on experience and show them how to turn their passion into a successful future career.

WHAT TO EXPECT FROM A TECHTRAILS

50-90 Students Participating

A Focus on Years 5 to 6

Flexible Session Times

Hands-On Activities

Understand Future Career Pathways

Learn from Inspiring Female Role Models

BENEFITS OF TECHTRAILS

HANDS-ON TECH EXPOSURE

Practical workshops to introduce students to cutting-edge technologies like AI and VR.

DIVERSE FEMALE ROLE MODELS

The program brings in a range of STEM experts promoting diversity and inspiration.

INTERACTIVE SKILL BUILDING

Through challenges and collaborative projects, students develop critical thinking and teamwork skills.

FUTURE-READY PREPARATION

We equip students with adaptable skills crucial for thriving in a technology-driven job market.
